

Modifying Slider Widget Content

IMPORTANT: If the widget was created using the Themify Builder, do NOT directly edit the HTML widget code to modify widget content. This may preclude editing the widget via the Themify Builder. Use the procedure below instead of editing the code.

Select the desired page.

Select the page that contains the desired Slider widget.

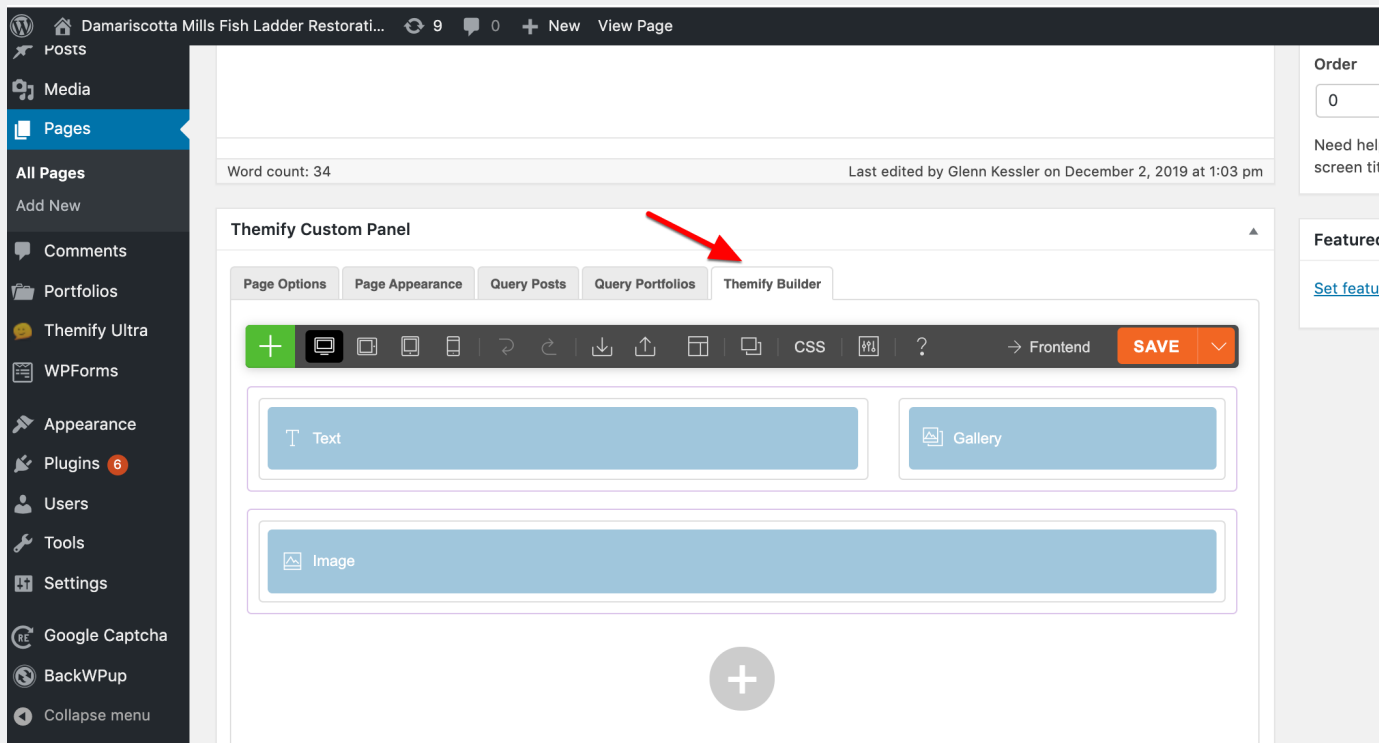

The screenshot shows the WordPress admin dashboard for 'Damariscotta Mills Fish Ladder Restorati...'. The left sidebar is open to the 'Pages' section. The main content area displays a list of pages with columns for checkboxes, page titles, authors, and publication dates. A red arrow points to the 'Festival Photos' page.

Modifying Slider Widget Content

Find the Themify Custom Builder

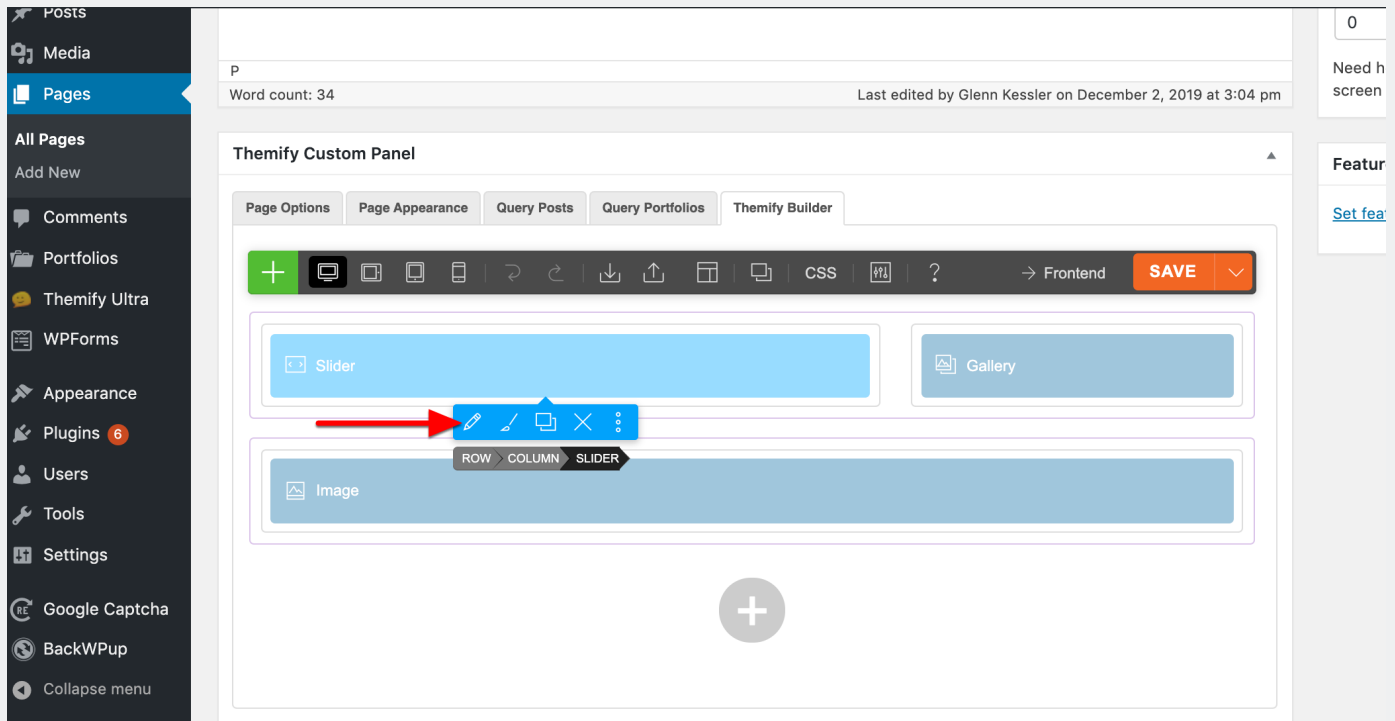

Scroll down to the Themify Custom Panel. Make sure the Themify Builder tab is selected.

Modifying Slider Widget Content

Open the edit window

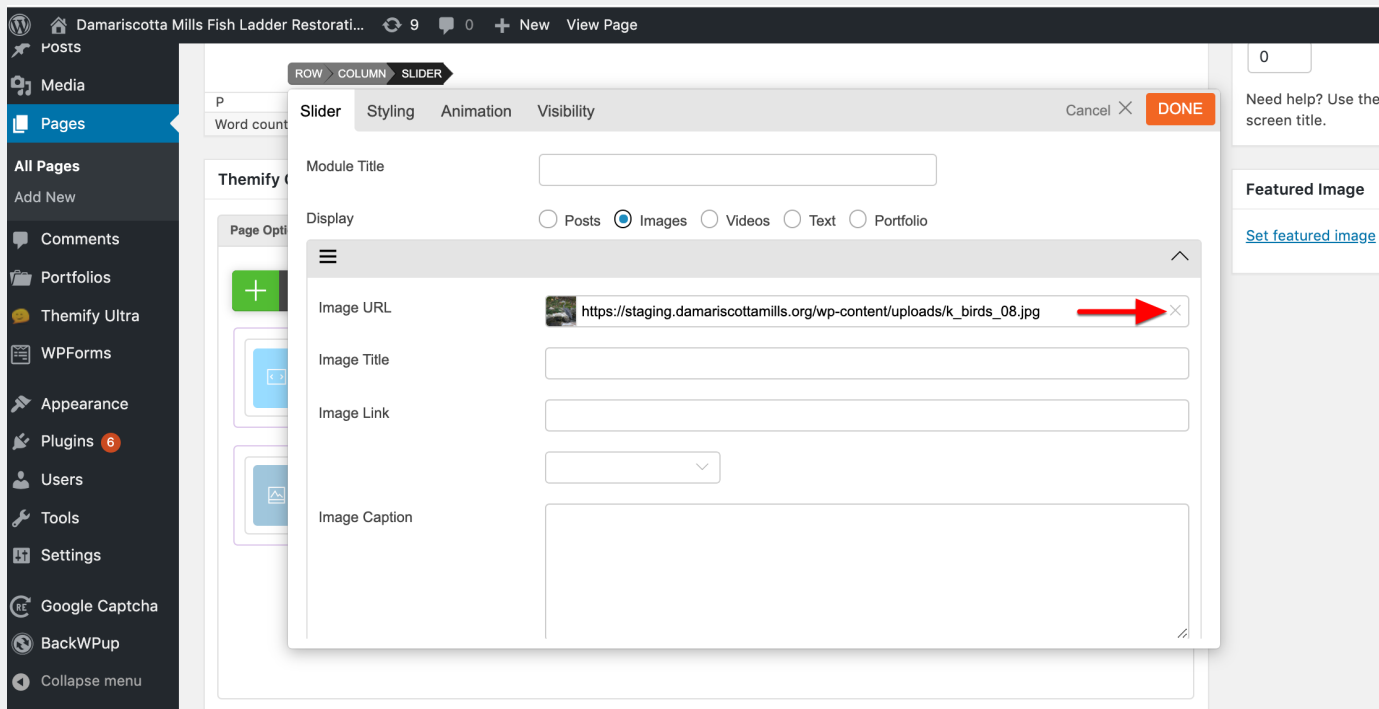

Move the cursor to the desired Slider widget, left click once and click on the Pencil icon to edit the widget.

Modifying Slider Widget Content

Delete a photo from the Slider

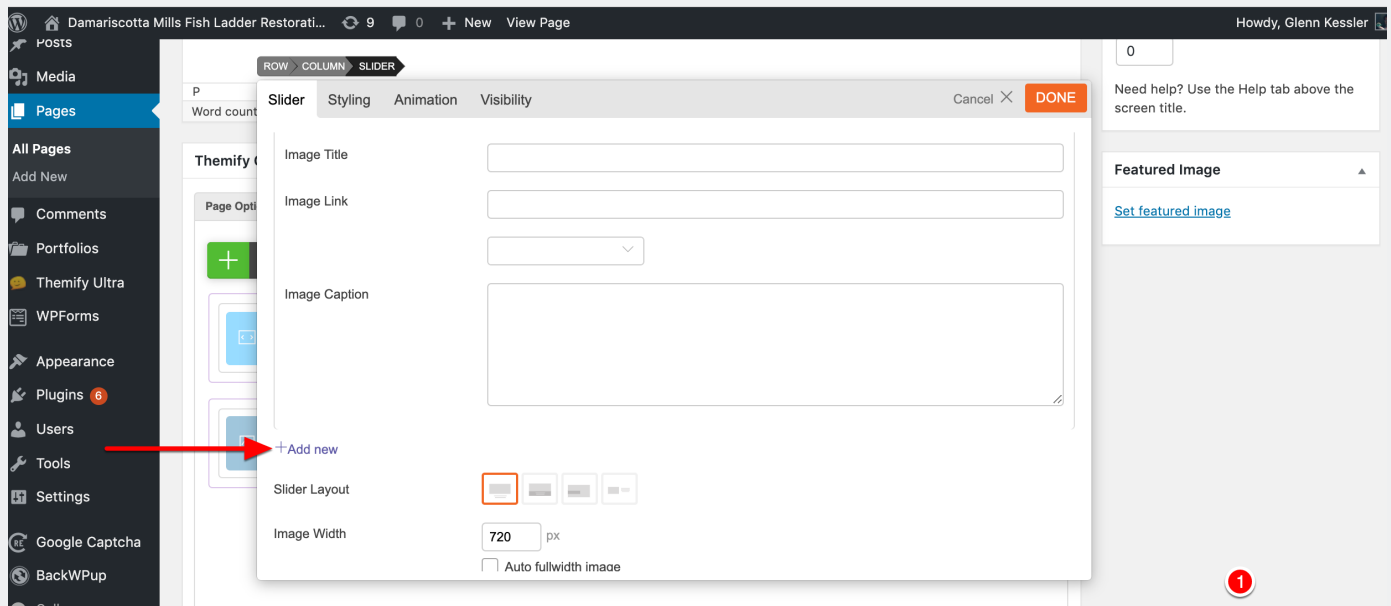

Scroll down to the desired image and click on the X to the right of the thumbnail and Image URL.

Modifying Slider Widget Content

Add a photo to the Slider

Scroll down to the Add New link and click the link.

Modifying Slider Widget Content

Select the photo

Select the desired photo from the Gallery by 1) clicking on the + next to Image URL and 2) clicking DONE.
